

Instructor's Guide: Adding SAGE content to a course via LTI

SAGE instructions for adding content to a course via LTI

Our LTI URLs are created by the LTI Deep Linking content selector, which creates a unique URL for each piece of content. This URL will be different from the URL you'd see on the SAGE Knowledge or SAGE Research Methods site. To insert the link, follow these steps.

Step 1

From the External Tool screen, select SAGE Publishing from the dropdown list and click the Select Content button.

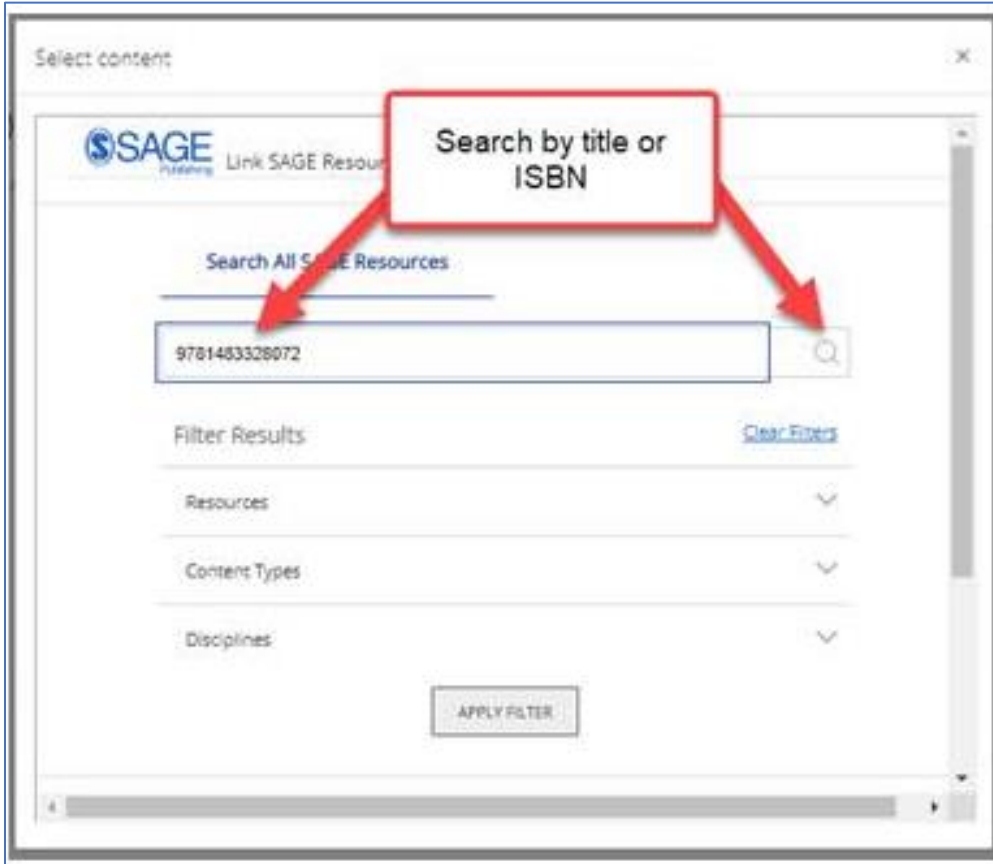

The screenshot shows the 'Adding a new External tool' form. The 'General' section is expanded, showing the following fields and options:

- Activity name:
- Show more...
- Preconfigured tool: (with a dropdown arrow)
- Select content:
- Tool URL:

Annotations include a red box around the 'Preconfigured tool' dropdown and the 'Select content' button, with two red arrows pointing from the box to each. The text inside the box reads: 'Select SAGE Publishing then click the Select Content button'. At the bottom of the form, there are three buttons: 'Save and return to course', 'Save and display', and 'Cancel'. A message at the bottom left states: 'There are required fields in this form marked [red icon]'.

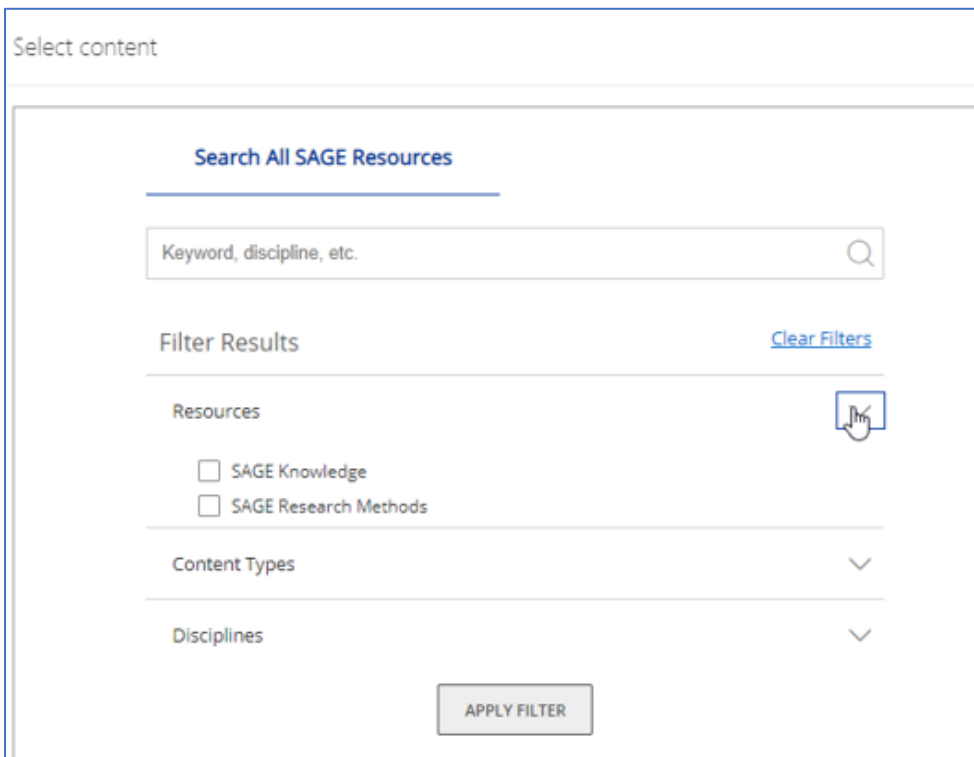

Step 2

Search for the content by title, keyword or the ISBN...

The screenshot shows a 'Select content' window with the SAGE logo and 'Link SAGE Resources' text. A search box contains the ISBN '9781483328072'. A red box highlights the search box and the search icon, with the text 'Search by title or ISBN' inside. Below the search box is a 'Filter Results' section with a 'Clear Filters' link. The filters include 'Resources', 'Content Types', and 'Disciplines', each with a dropdown arrow. An 'APPLY FILTER' button is at the bottom.

...or search by website (SAGE Knowledge or SAGE Research Methods), content type or discipline

The screenshot shows the 'Select content' window with the search box containing 'Keyword, discipline, etc.'. The 'Filter Results' section is expanded to show the 'Resources' filter, which has two options: 'SAGE Knowledge' and 'SAGE Research Methods', each with an unchecked checkbox. The 'Content Types' and 'Disciplines' filters are also visible with dropdown arrows. A 'Clear Filters' link is next to the filter results. An 'APPLY FILTER' button is at the bottom.

Resources ▼

Content Types ▼

- Select All
- Book
- Case
- Datasets
- Dictionary
- Encyclopedia
- Foundation Entry
- Podcast
- Project Planner
- Video

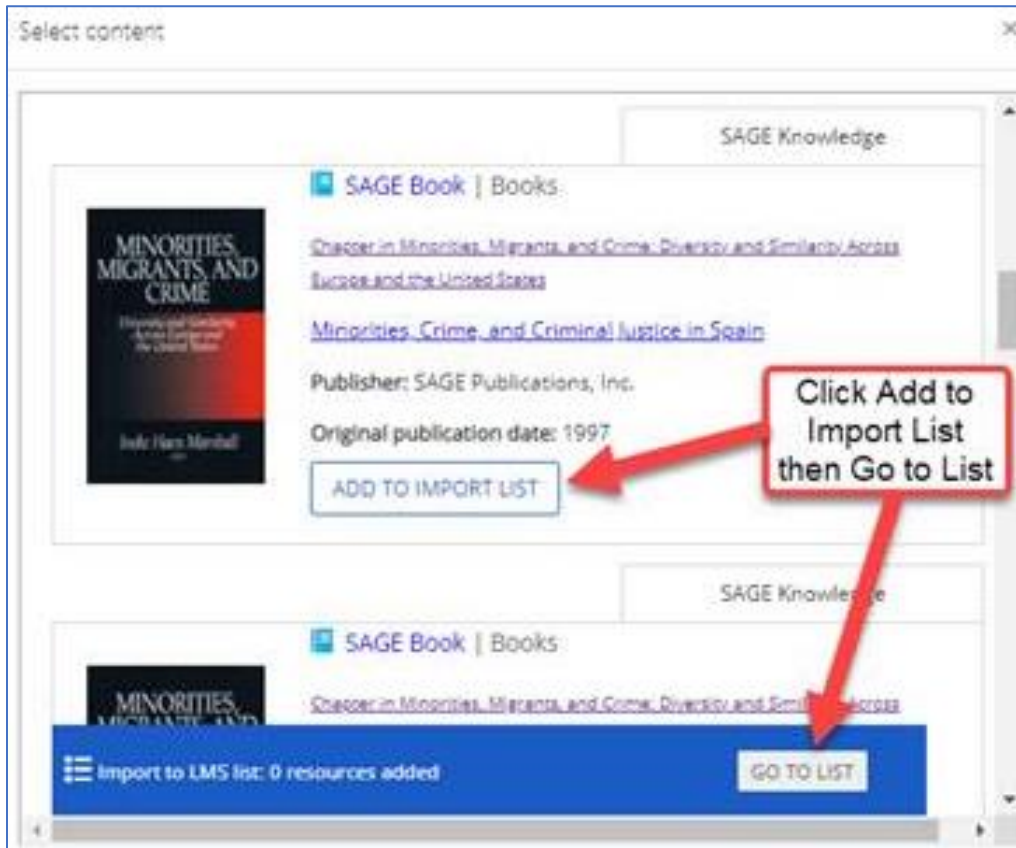

Disciplines ▼

Disciplines ▼

- Select All
- Business & Management, Economics and Marketing
- Computer Science
- Counseling & Psychotherapy
- Criminology & Criminal Justice
- Dentistry
- Education
- Engineering
- Geography
- Health, Nursing and Social Work
- History, Communication and Media Studies
- Leadership
- Mathematics
- Medicine
- Psychology
- Public Health

Step 3

Once you've chosen your content from the search results, click the "Add to Import List" button for the content you wish to add to your LMS. When finished adding selections, click the "Go to List" button.

Step 4

Click the "Import to LMS" button. You will be returned to your LMS to click the Save and return to course button. **Note:** Do not adjust the URLs that are inserted by this process. The title of the links can be adjusted, if desired.

When clicking the links that are ultimately created, you should be redirected to the content and automatically logged into the platform as your institution.
